RELOOP 360

SMART CIRCULAR ECONOMY PLATFORM

Recover. Reuse. Reward.

Turning Waste into Value Through Smart Recovery Solutions.

COMPANY PROFILE 2026

1. Company Overview

RELOOP 360 is an innovative circular economy startup focused on transforming surplus, returned, damaged, and unused products into valuable resources. The company works with businesses that generate electronic waste and food surplus, helping them recover value through inspection, sorting, repair, refurbishment, resale, recycling, and donation.

By connecting suppliers of unused resources with potential buyers and recovery opportunities, RELOOP 360 aims to reduce waste, create new revenue streams, and promote sustainable business practices.

2. Mission, Vision & Values

Our Mission

To transform waste and unused products into valuable resources through smart recovery processes, sustainable operations, and strategic business partnerships.

Our Vision

To become a leading circular economy company in Egypt, creating a future where fewer resources are wasted and more products receive a second life.

Our Core Values

Value	Meaning
Sustainability	Reducing waste and protecting natural resources.
Innovation	Finding new ways to recover product value.
Transparency	Maintaining clear and traceable operations.
Quality	Ensuring recovered products meet appropriate quality standards.
Collaboration	Building strong relationships with suppliers, customers, and partners.
Responsibility	Promoting environmentally responsible decisions.

3. Our Business Activities

A. Electronics Recovery

We collect unused, returned, and damaged electronic devices from companies. Our activities include:

- Product inspection and classification
- Repair and refurbishment
- Quality control and testing
- Resale of recovered devices
- Recycling of non-repairable devices and components

B. Food Surplus Recovery

We collaborate with supermarkets and food retailers to recover surplus and near-expiry food. Our activities include:

- Food collection and inspection
- Expiry-date and condition verification
- Sorting and classification
- Discounted resale of suitable products

• Donation of eligible food
• Safe disposal of unsuitable products

4. Our Recovery Process

RELOOP 360 follows a structured recovery process. Each item is assessed before a suitable recovery pathway is selected.

Step	Activity	Purpose
1. Recover	Collect surplus and unused products.	Bring products into the recovery process.
2. Inspect	Evaluate condition, quality, expiry, and potential value.	Determine whether an item is suitable for recovery.
3. Repair	Restore products that can be reused.	Extend useful product life where feasible.
4. Resell	Offer recovered products for sale.	Generate value from suitable recovered items.
5. Final route	Recycle, donate, or safely dispose.	Choose the most appropriate final destination.

Example: A supermarket provides near-expiry food. RELOOP checks product condition and expiry dates, separates eligible items for discounted resale or donation, and safely handles unsuitable products.

5. Target Market

Supply Partners
• Supermarkets and food retailers, such as Carrefour and Fathalla.
• Companies with unused or damaged electronic devices.
• Businesses with returned or surplus inventory.

Customers and Beneficiaries
• Individuals looking for affordable refurbished electronics.
• Businesses purchasing recovered electronic devices.
• Consumers interested in discounted food products.
• Charities and eligible donation organizations.
• Manufacturers and recycling companies interested in recovered materials.

6. Our Value Proposition

Stakeholder	Value provided
Suppliers	Better management of surplus and unused inventory.
Buyers	Access to affordable recovered products.
Retailers	Opportunities to recover value from surplus food.
Charities	Access to eligible donated food.
Environment	Reduced waste and better resource utilization.

Our differentiator: Smart Recovery Score

RELOOP proposes an internal evaluation method called the **Smart Recovery Score**. It assesses product condition, repair cost, expected resale value, and reuse potential to support recovery decisions. This is a proposed business feature, not a currently validated or deployed scoring system.

7. Business Model & Revenue Streams

RELOOP generates revenue through:

1. Selling refurbished electronic devices.
2. Selling products created from recycled materials.
3. Reselling eligible surplus food at discounted prices.
4. Potential future recovery and collection service fees.

The company initially relies on capital contributed by its owners to support startup operations.

8. Technology & Management System

RELOOP 360 plans to use Odoo ERP as its central business management system. The proposed implementation is configuration-only, without custom development or Odoo Studio.

Odoo Module	Business Purpose
CRM	Manage suppliers and potential customers.
Purchase	Manage collection and procurement agreements.
Inventory	Track products and warehouse movements.
Barcode	Identify and track products.
Quality	Inspect products and record quality checks.
Repair	Manage electronic device repairs.
Manufacturing	Manage recycling and transformation processes where applicable.
Sales	Manage recovered product sales.
Accounting	Record revenues, expenses, and financial transactions.
Website / eCommerce	Display and sell recovered products.
Dashboards	Monitor business performance.

9. Strategic Objectives

• Reduce the amount of usable products sent to waste.
• Build long-term partnerships with businesses.
• Increase the recovery and resale value of surplus products.
• Establish an organized and traceable recovery process.
• Build a financially sustainable circular business.
• Expand operations across different product categories.

10. Company Identity

Company Name	RELOOP 360
Tagline	Recover • Reuse • Reward

Industry	Circular Economy & Resource Recovery
Business Type	Sustainable Recovery & Resale Company
Proposed Location	Egypt
Website	To be developed
Contact Information	To be announced

“Waste is not the end. It is the beginning of new value.”

Profile note: This document describes the proposed RELOOP 360 business concept. Company registration details, founding date, office address, management team, certifications, financial figures, and confirmed partnerships have not been supplied and are therefore not stated as facts.
